

Meikel

BEING CLEVER is thinking before doing .

In the story of THE LOST HORSE, Sai said maybe it's okay if my horse got lost. He was thinking in the future, not the past. He was patient.

In the story of WILEY AND THE HAIRY MAN, Wiley was quick witted. He was thinking each time the Hairy Man was trying to eat him up. He was thinking, "I bet that you can't make all the rope in the world disappear", and then the Hairy Man said, "Oh yes I can," and he made all the rope disappear and Wiley's dogs were free and they sacred away the Hairy man.

They both thought before doing!

JONGO

Being clever is when doing something and think when to do the right thing.

Wiley was clever because he thought he was quick witted
And he said you can't make all the string disappear and he did then the dogs
Ran then the hairy man ran away then Wiley came down the tree then he went
home.

The hairy man was mad because Wiley never came down
Then the hairy man made all the rope disappear the hairy man got mad
Then Wiley out witted the hairy man the dogs came the hairy man ran away
Then the dogs ran after the hairy man then Wiley he sacked the Hairy man. Wiley
got away.

Sai was a wise man then Sai's son was riding the white horse then he fell off
The horse then he hurt his leg then Sai thought about the future and the Japanese
people came to the castle and fought Sai but Sai's son couldn't fight because his leg
was broken.

Shavasha

Wiley and the Hairy Man

Being clever is being smart and being quick witted like Wiley and Sai.

Wiley was smart because he outwitted the Hairy Man by saying you can't disappear all the ropes in the city. He said, "Oh, yes I can." And then he disappeared all the ropes and then the dogs came running.

Sai was thinking about the future when he said that it will be okay. Even if his son broke his ankle. He was right. His horse did come back and his son was okay.

Sai and Wiley was smart. Wiley out witted the Hairy Man. Sai thinking in the future.
